

# Play it from the Rough.

## Neonode® zForcetouch interaction gives you total control—even when you're wearing gloves.

Add versatility and performance to your golf cart displays by including zForce optical sensing technology to any display or surface—even in the most demanding environments.

Over 68 million consumer products and 4 million cars have used our optical sensing Technology over the past two decades

Don't settle for ordinary touch controls or display panels when you can design in a reliable, rugged and economical zForce today!

### Climate Independent

Outfit your display for bad weather or dirty environments with easily adjustable detection distance.

### Gloves On!

Neonode Touch Sensors work with all gloved hands—regardless of glove material or thickness.

### Light Resistant

Neonode Technology works in environments with intense or glaring light without any aging effect.

### No Electromagnetic Interference (EMI)

Neonode Sensors provide reliable interaction without EMI issues in sensitive environments.

### Temperature Robustness

Neonode Touch Sensors add interaction to any surface in hot or cold temperatures without degradation.

Contact your regional Neonode Sales Representative to design zForce into your next application today.
